OTHER: Grosgrain ribbon.

INSTRUCTIONS

Cover both sides of ring and circle pieces in two sheets of PRECIOUS. Cover both sides of the elephant in the plain section of KID, and both sides of the rocking horse in KID (reverse). Using the third sheet of PRECIOUS (reverse), cover the pram in the alphabet section, the duck in the gingham section and the teddy bear in the music section.

Tie long lengths of twine four of the wooden pieces, and tie a knot in each length. Make knots anywhere from 10cm (4") to 20cm (8") above wooden piece. Thread twine through holes in ring, threading from the underside. Thread long tails of twine through circumference holes in circle piece. Tie knot in each length of twine 20cm (8") above ring - each length needs to be at the same measurement so that mobile balances properly. Tie another long length of twine to the fifth wooden piece. Fold about 15cm (6") of the end back on itself and thread loop through the central hole of the underside of circle piece. Tie a knot underneath so that loop is secured above circle piece.

Cut up the narrow edging strip from BUNDLE into individual words; also cut out the "I love you" from the edging strip of BAMBINO, Ink around the edges of piece and use foam dots to adhere to wooden piece. Tie ribbon bows to the twine at the top of each wooden piece.
